Name: Bhavana Shree.B.S [24MCR011]

Class: I – MCA – "A"

TASK - 1

DEVOPS TRAINING

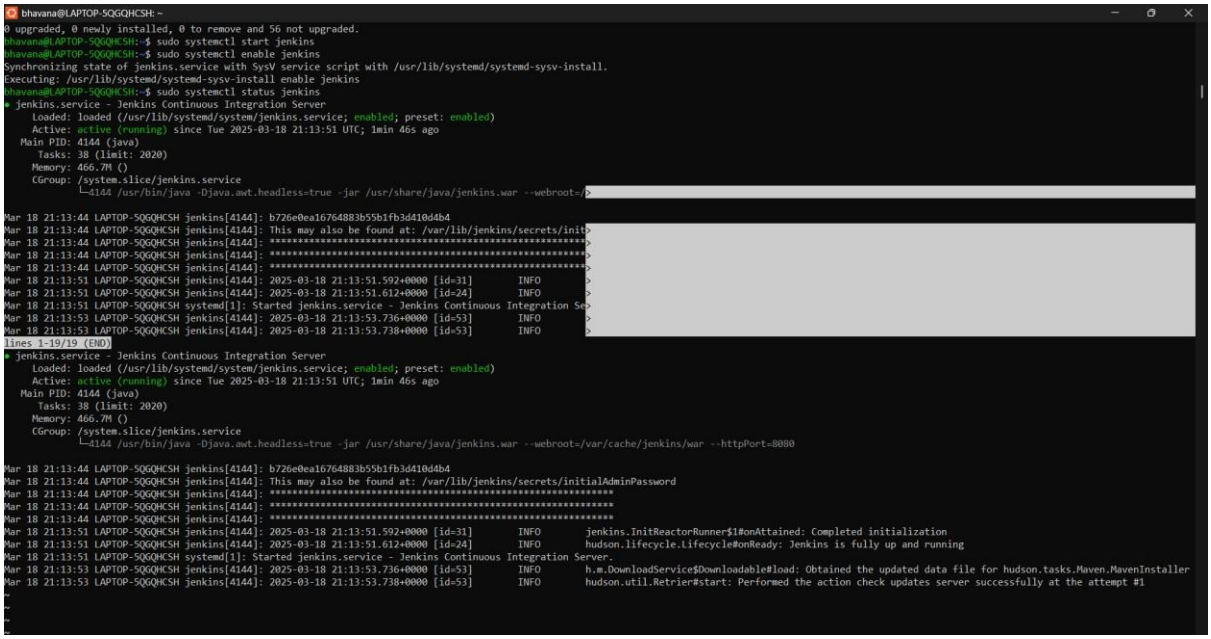
Step 1: (Installing Ubuntu)

Enable WSL

Before installing Ubuntu, ensure that WSL is enabled on your Windows system.

Enable WSL Feature

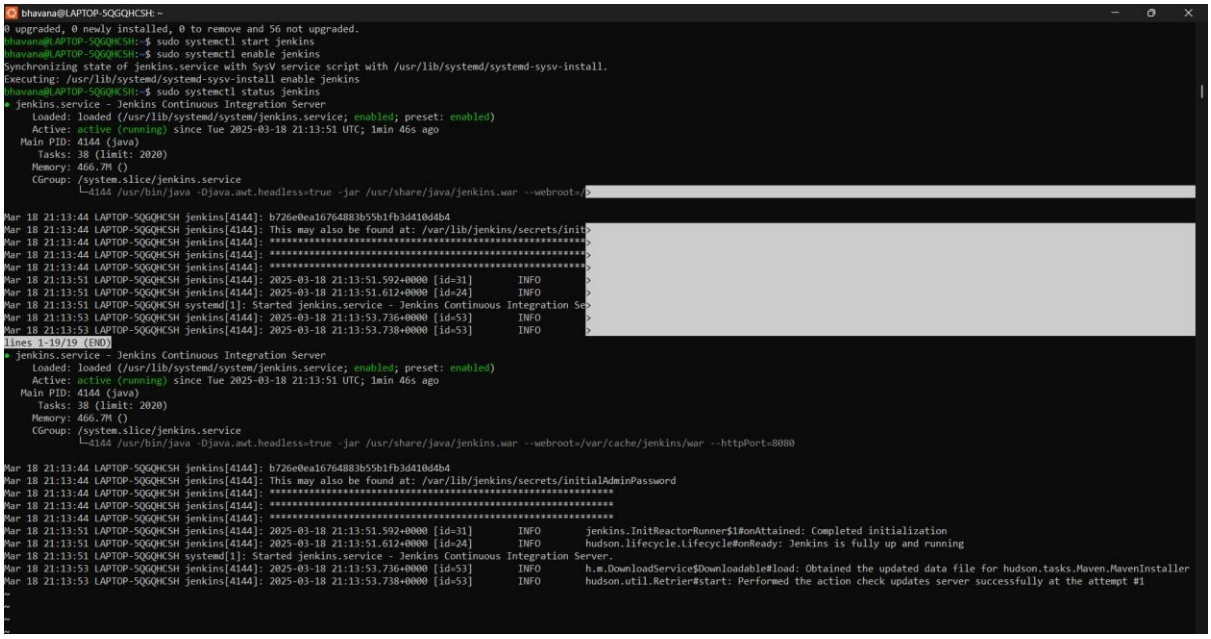
1. Open **PowerShell** as Administrator and run:
2. wsl –install



Step 2: (Set New Password) Set Up Ubuntu

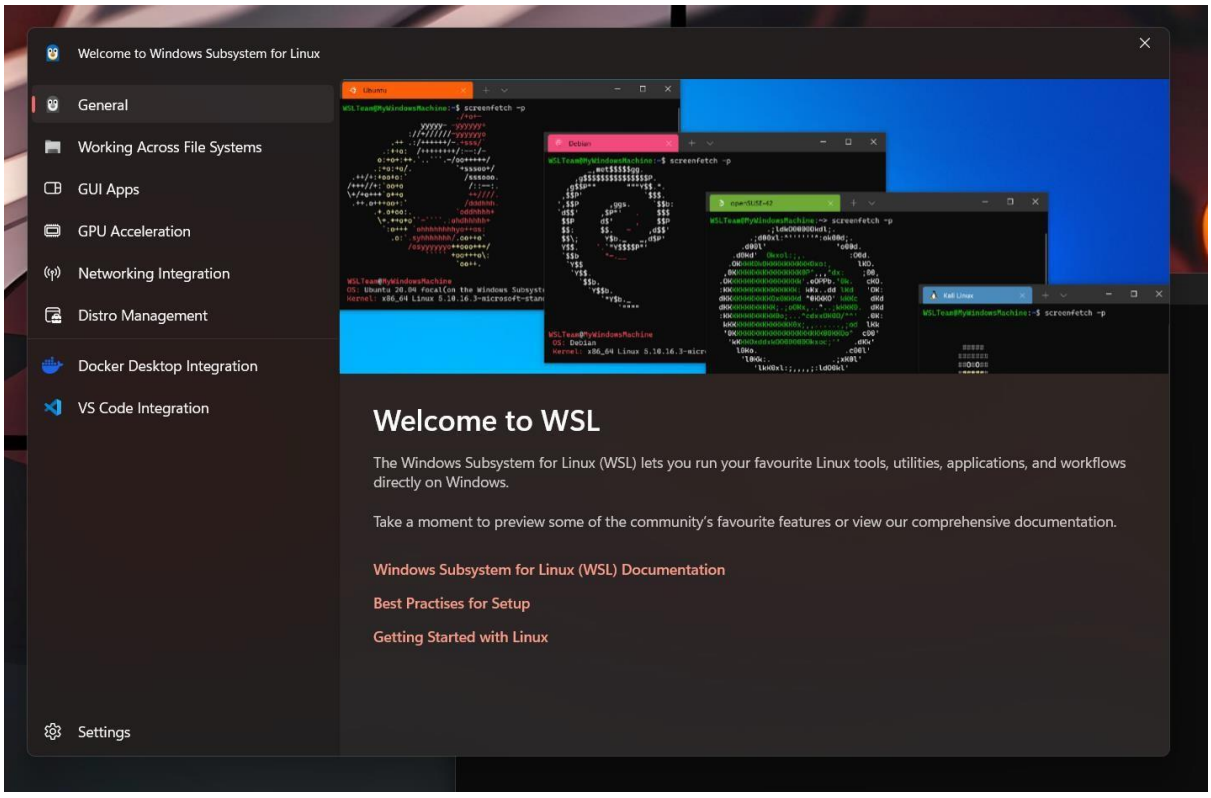
When Ubuntu runs for the first time, it will ask you to create a new user account.

1. **Enter a username** (must start with a lowercase letter or underscore, and contain only lowercase letters, digits, underscores, and dashes).
2. **Set a password** (enter and confirm the password). If passwords do not match, you will need to retry.
3. Once successful, Ubuntu will be set up and ready to use.



Step 3:

(New WSL Window Will Open)



Step 4:

(Check JDK Version**)** If not available install it .

Install Jenkins on Ubuntu

Update package lists sudo

apt update -y

Install Java (Required for Jenkins) sudo apt install -y openjdk-17-jdk

#verify java version java -version

Add Jenkins GPG Key

wget -q -O- https://pkg.jenkins.io/debian-stable/jenkins.io-2023.key | sudo tee /usr/share/keyrings/jenkins- keyring.asc > /dev/null **Add the Jenkins Repository**

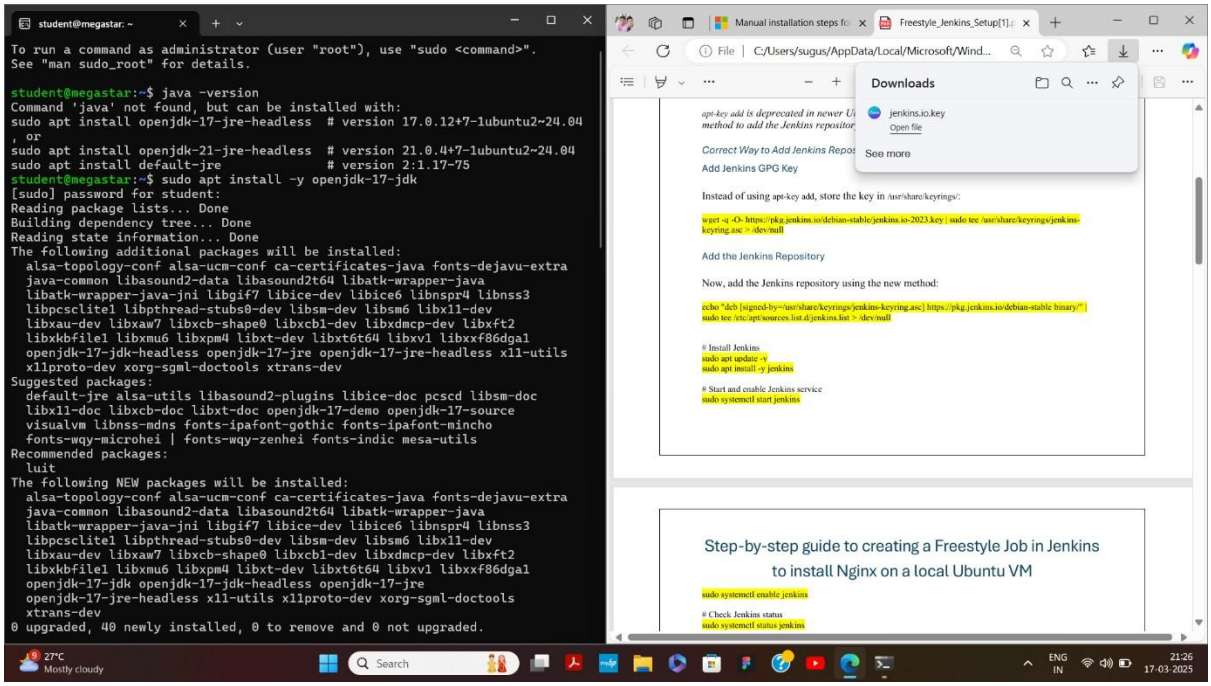
echo "deb [signed-by=/usr/share/keyrings/jenkins-keyring.asc] https://pkg.jenkins.io/debian-stable binary/" | sudo tee /etc/apt/sources.list.d/jenkins.list > /dev/null

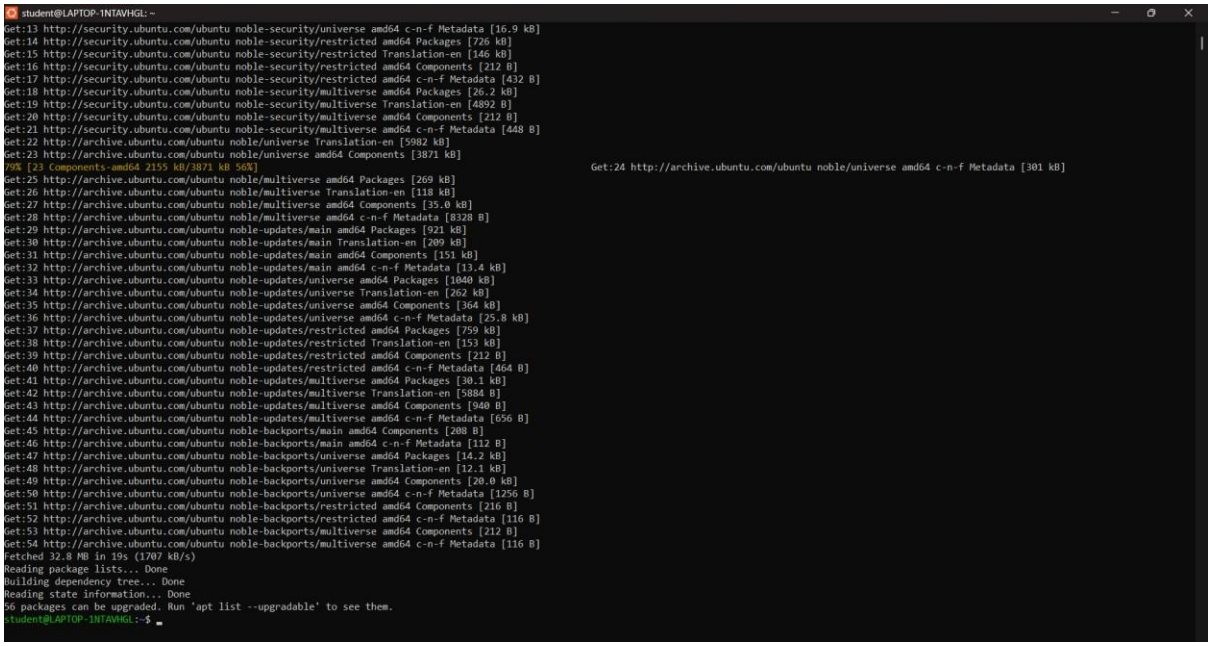
 # Install Jenkins sudo

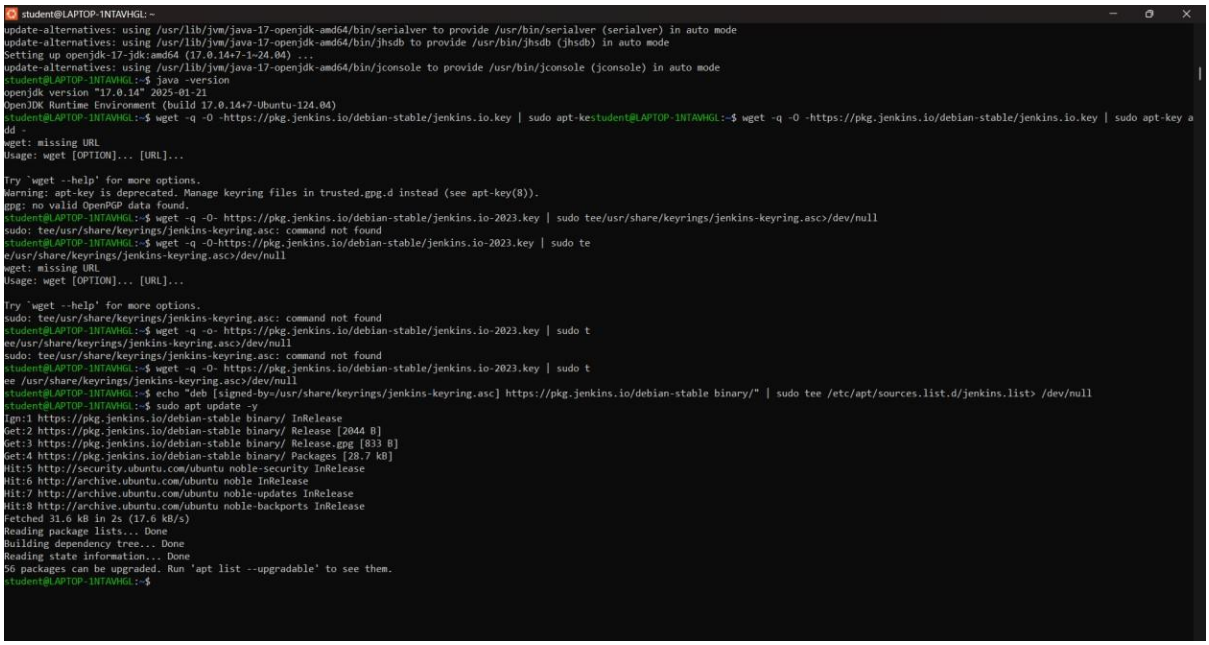
apt update -y sudo apt

install -y jenkins

 # Start and enable Jenkins service sudo systemctl start Jenkins



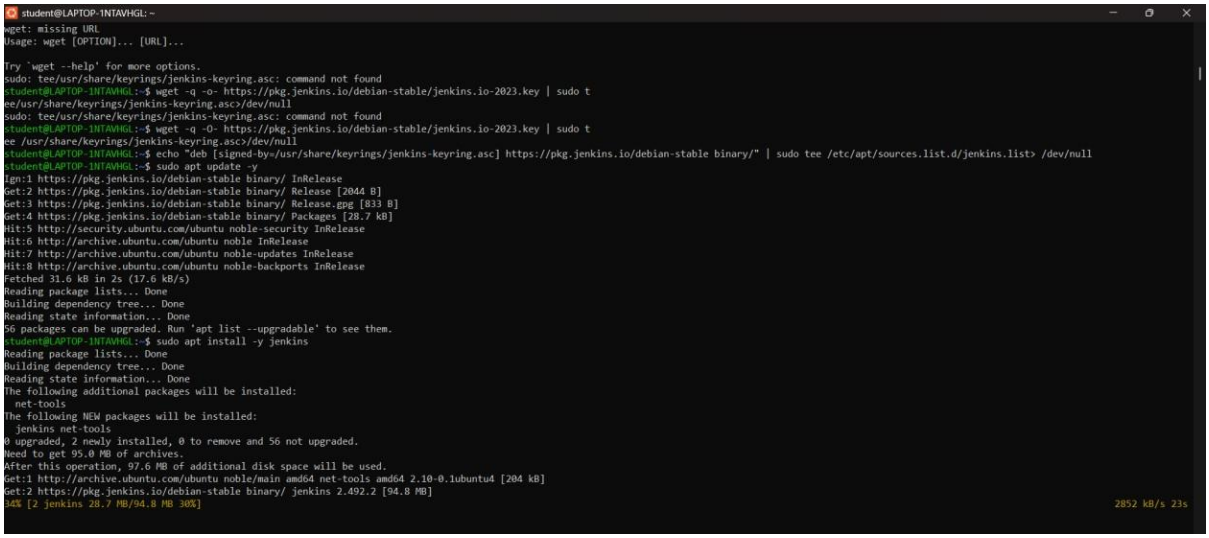




Step 5: Install Jenkins

sudo apt update -y sudo

apt install -y jenkins



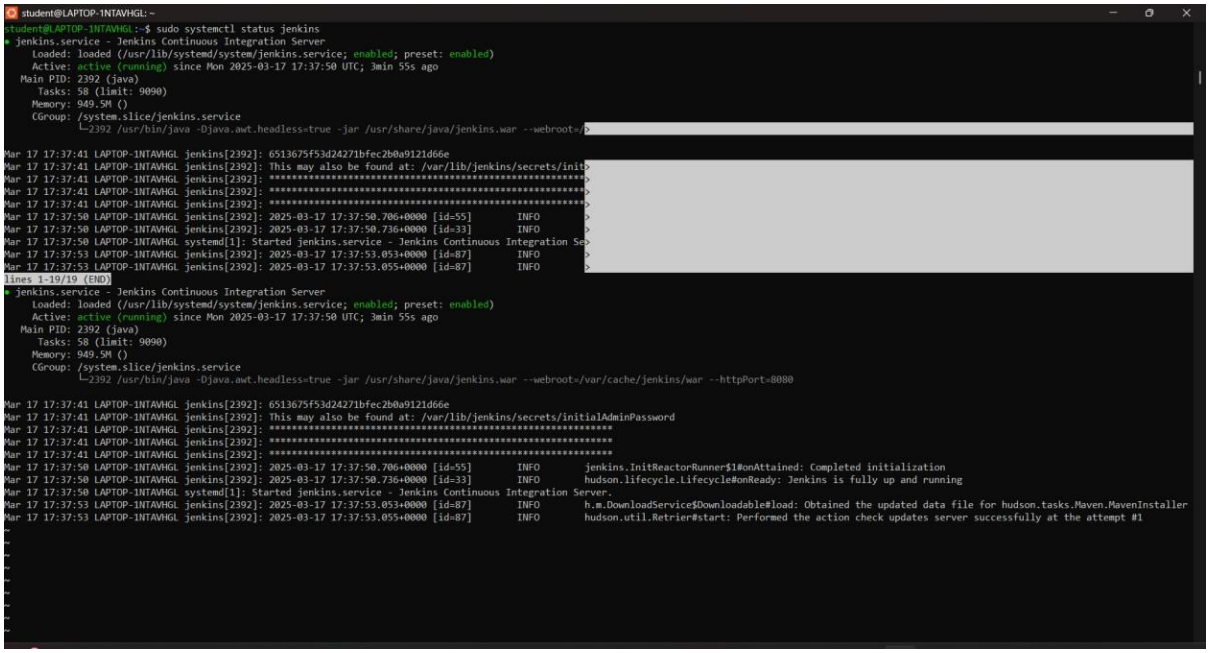
Step 6: Check Jenkins Status sudo systemctl status jenkins cat copy the localhost:8080 admin path display the password

=>By default, Jenkins runs as a system user (jenkins). If your script requires sudo, you must allow the Jenkins user to run commands without a password. sudo visudo

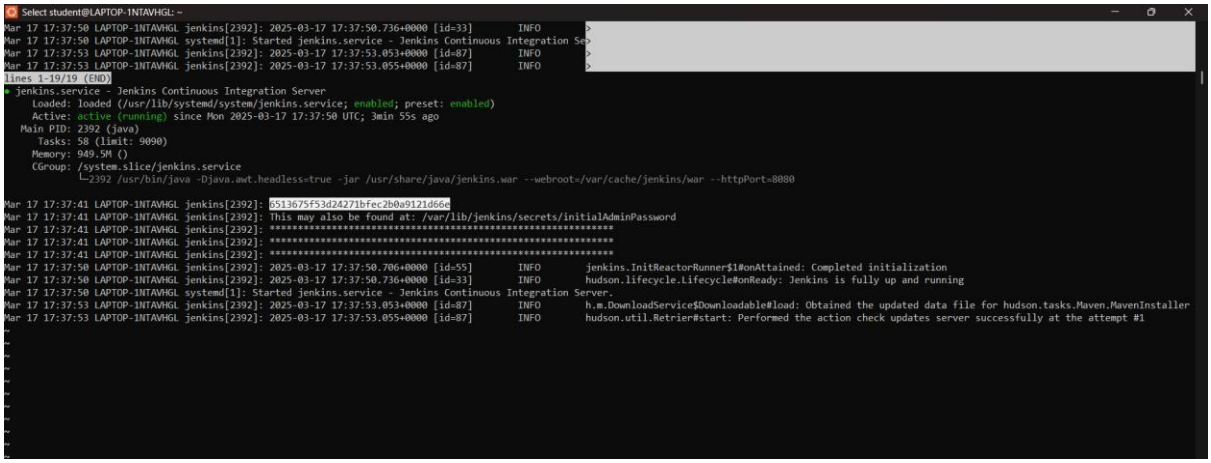
Add the following line at the end:

jenkins ALL=(ALL) NOPASSWD: ALL

Save and exit.



Step 7: (Enter the Administrator Password)



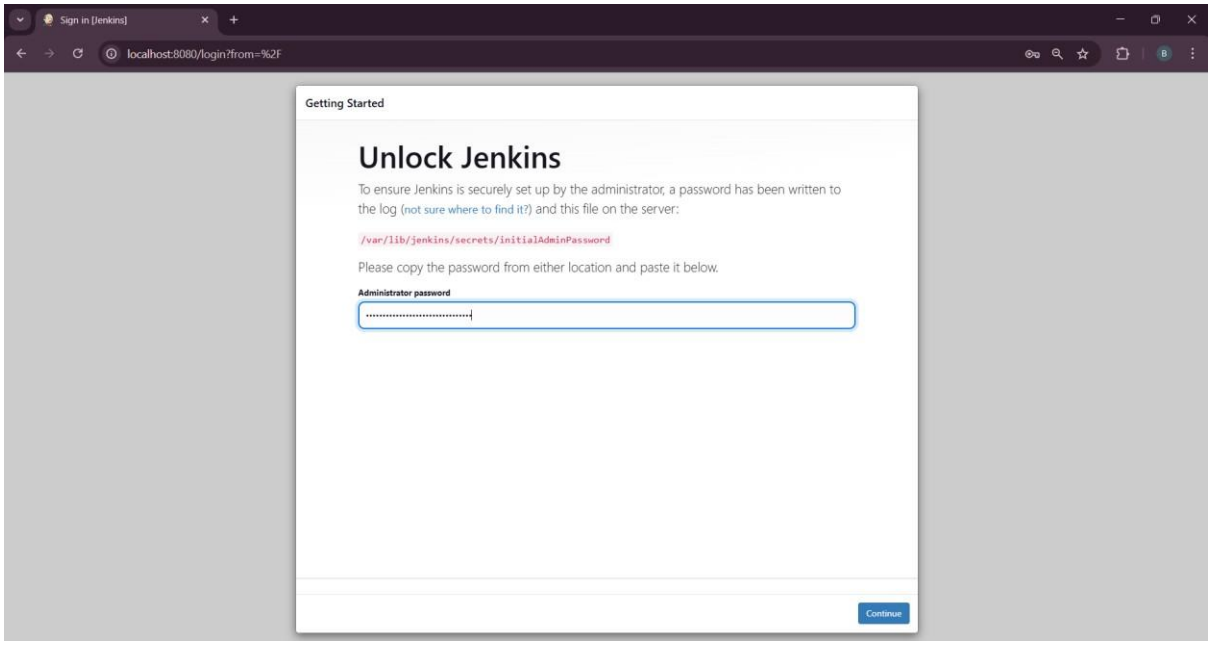
Step 8: Access Jenkins Web Interface

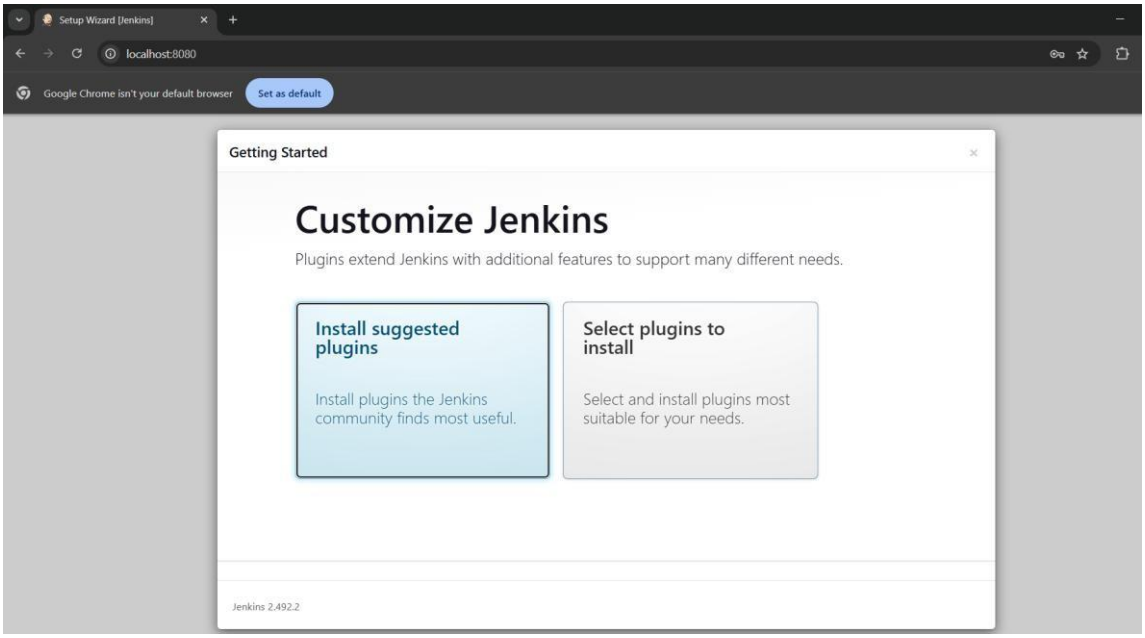
Jenkins will be available at http://localhost:8080

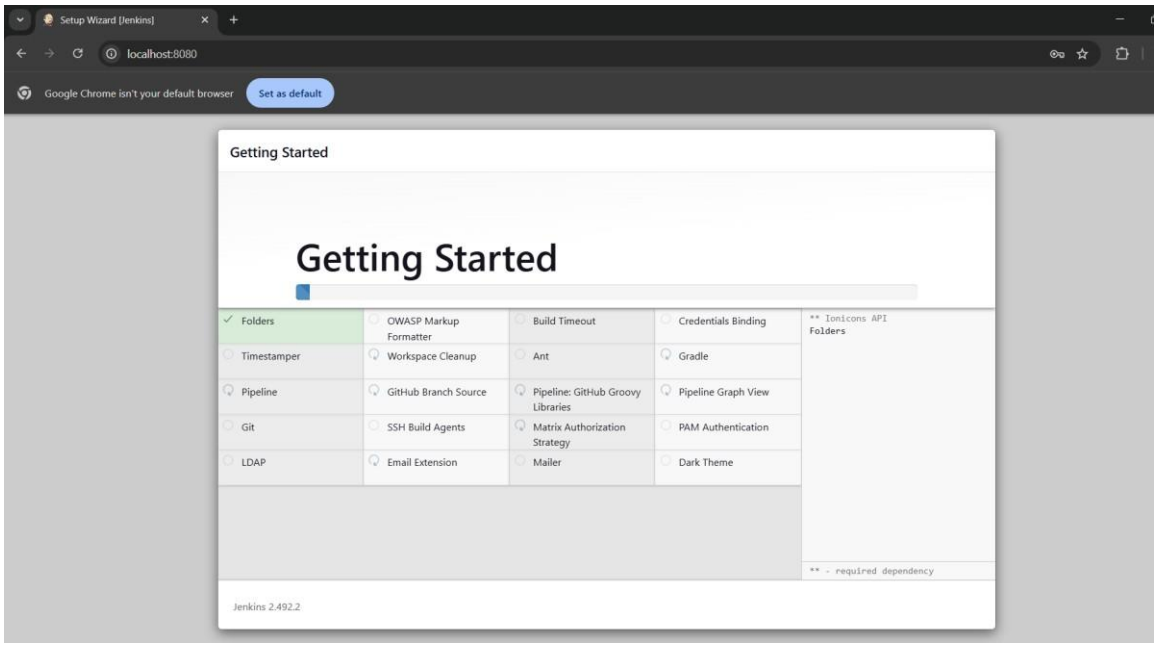
To Get the Jenkins Server URL, Follow These Steps:

Method 1: Check the Default URL

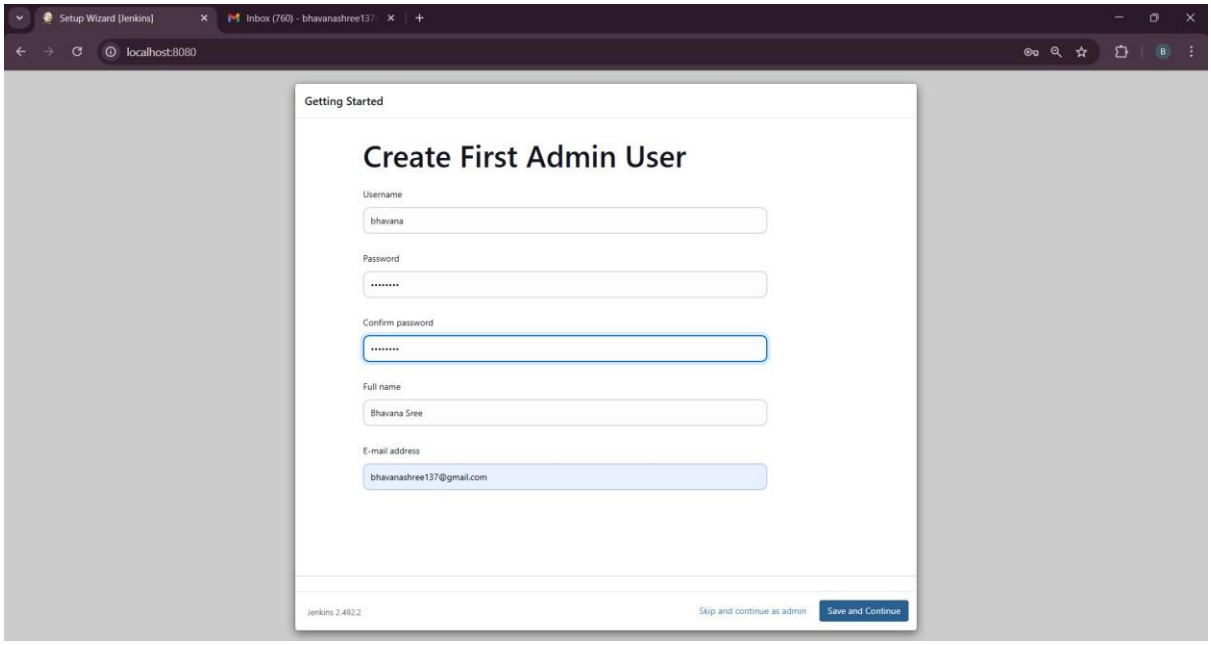
By default, Jenkins runs on port 8080. Open in a browser: http://<your-server-ip>:8080





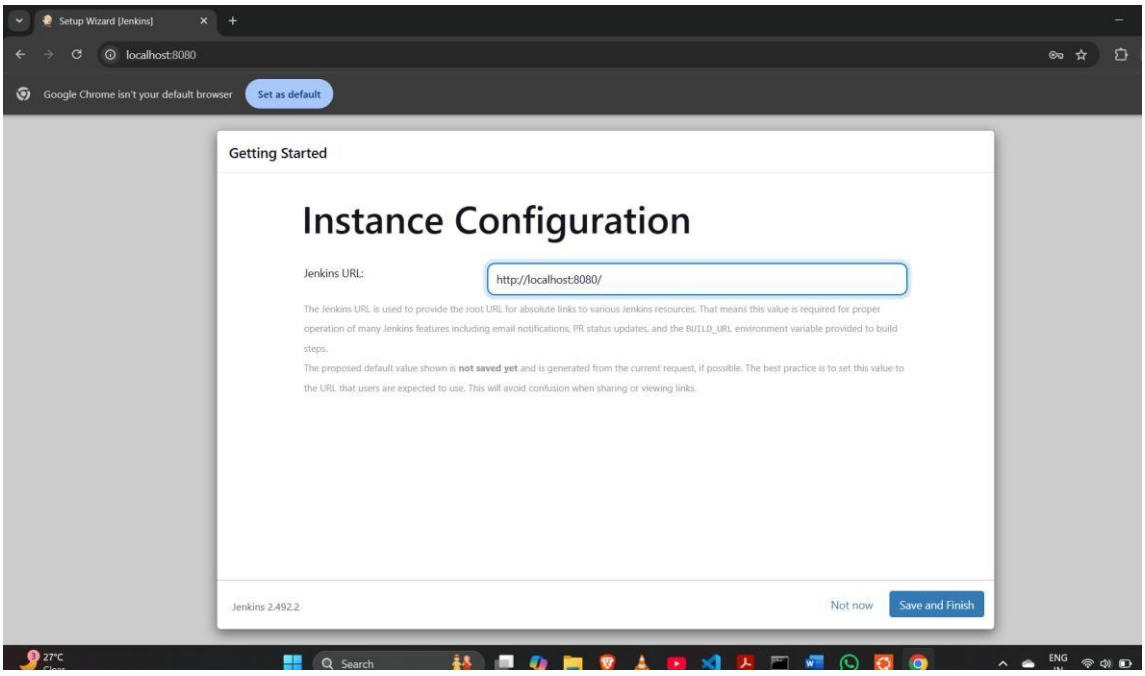


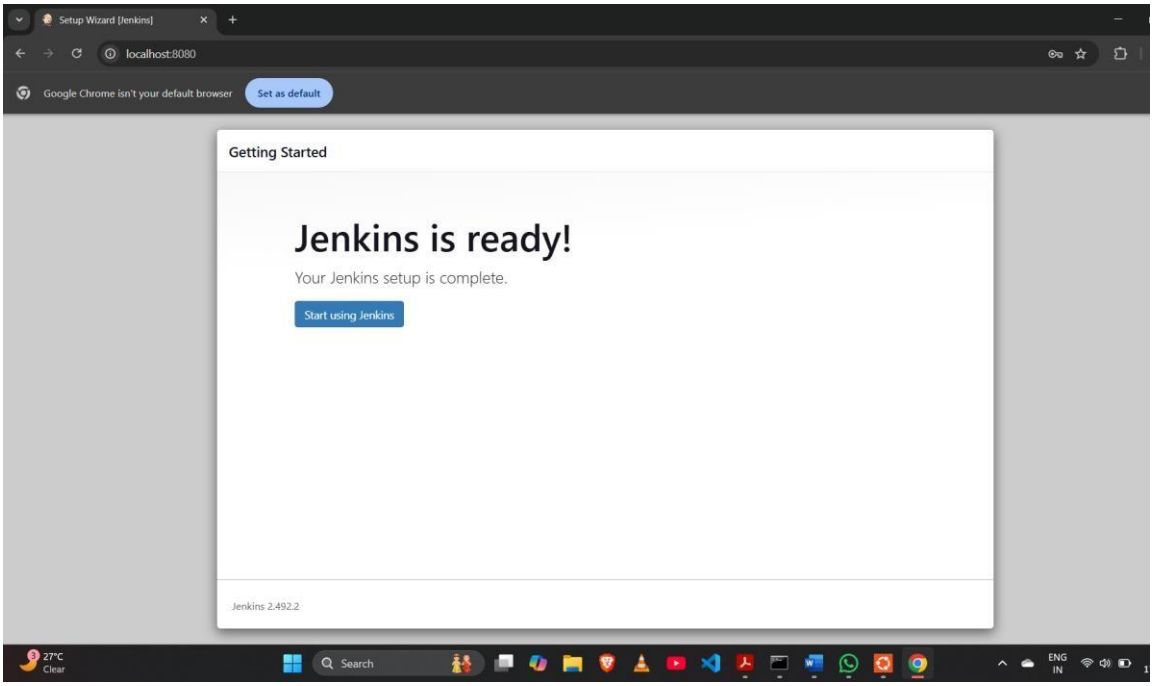
Step 9: (Create First Admin User)



Step 10: (Enter the URL)

If you're on the same machine as Jenkins, use: http://localhost:8080





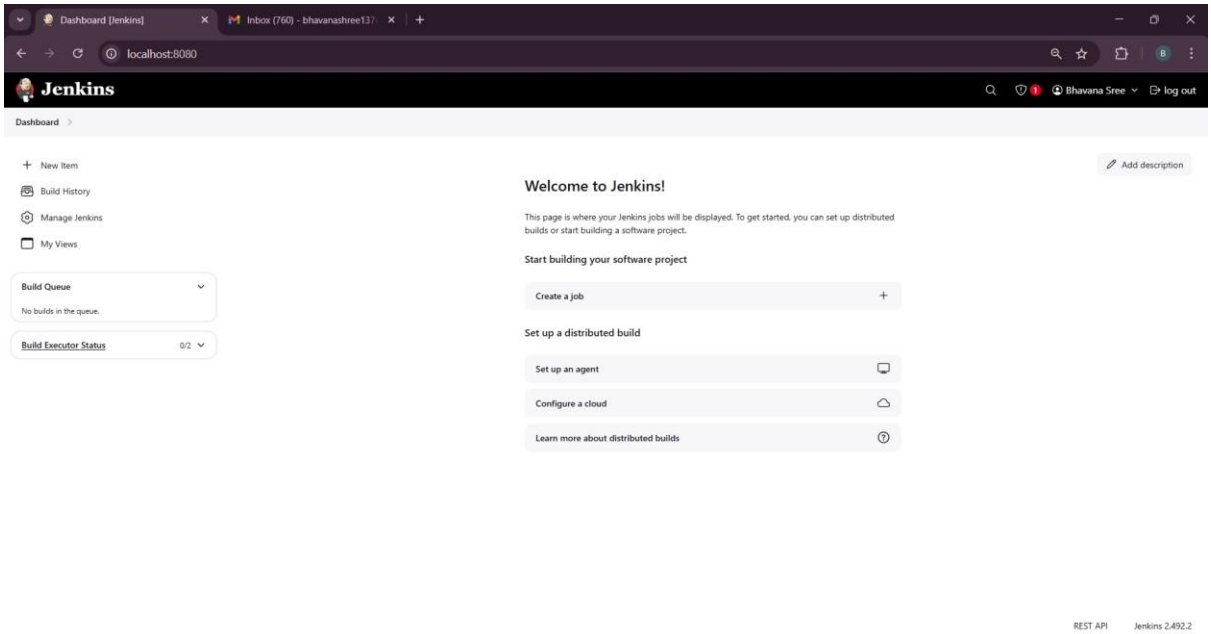
Step 11:

(Create an Project ex.ms)

(In Configure build and Select Execute shell)

(Build the Project)

SELECT BUILD NOW



Step: 12

Step-by-Step Guide to Creating a Freestyle Job in Jenkins to Install Nginx Step 1: Create a New Freestyle Job

1. Click on **New Item** from the Jenkins Dashboard.

2. Enter a name for the job, e.g., *Install-Nginx*.

3. Select **Freestyle project**.

4. Click OK.

Step 2: Configure the Job

Add Build Step

1. Scroll down to **Build** → Click *Add build step* → Select **Execute shell**. 2. Paste the following script in the command box: echo "Updating package lists..." sudo apt update -y echo "Installing Nginx..." sudo apt install -y nginx echo "Starting Nginx service..." sudo systemctl start nginx

echo "Enabling Nginx to start on boot..."

sudo systemctl enable nginx echo

"Nginx Installation Completed!"

Step 3: Save and Run the Job

1. Click **Save**.

2. Click **Build Now**.

3. Check the **Console Output** to verify the installation.

Step 4: Verify the Installation

1. Check Nginx Status systemctl

status nginx

If running, you should see output like *"active (running)"*.

2. Open Nginx in Browser http://localhost:80

You should see the default Nginx welcome page
